DOMINION ORDERS IN COUNCIL.

[1906.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Saturday, the 13th day of September, 1919.

PRESENT:

THE DEPUTY GOVERNOR-GENERAL IN COUNCIL.

WHEREAS the Minister of the Interior reports that Mr. Henry David Hipwell, of Chilliwack, British Columbia, has made application to the Department of the Interior for a quit claim of any interest the Dominion may have in a certain triangular-shaped parcel of land, comprising 8.80

acres, more or less, which is included in the northern part of Lot 423, Group 2, Township 3, Range 30, west of the 6th meridian, and which adjoins the southern boundary of Mr. Hipwell's patented homestead, such parcel being shown hatched in black on the accompanying tracing:

That Mr. Hipwell's application is based on his contention that the northern boundary of the said Lot 423, which forms the southern boundary of his homestead, is incorrectly shown on the plan of survey of record in the Department of the Interior, his claim being that such boundary should run on a due east and west line in accordance with the original provincial survey made in 1885, as indicated by dotted line on the tracing and not at an angle as shown on the plan of survey of record in the Department of the Interior dated the 4th January, 1917, and indicated on tracing by full black line:

That the lands adjoining the said Lot 423 were surveyed by a Dominion Land Surveyor in 1893, and that in order to survey these lands it was necessary for the surveyor to retrace the northern boundary of the lot; that the surveyor found posts marked with the number of the lot which he took to be the posts planted by the surveyor in the original provincial survey for the north-east and north-west corners of the lot, but the line joining these two posts, instead of running east and west as represented in the provincial survey, runs at an angle as shown on the tracing; and that it may be that the post marking the north-west corner of the lot was removed from the place where it had been placed in the original survey but there is no evidence that such is the case:

Therefore, the Deputy Governor-General in Council is pleased to authorize and doth hereby authorize the grant of a quit claim to Mr. Henry David Hipwell of any interest the Crown in the right of Canada may have in the said triangular-shaped parcel of land comprised in Lot 423, Group 2, Township 3, Range 30, west of the 6th meridian, which is more particularly described as follows: Commencing at a wooden post planted by C. E. Woods, Provincial Land Surveyor, on the 10th December, 1885, on the left bank of the Fraser River to mark the north-western corner of Lot 423, Group 2; thence easterly on a straight line a distance of 32 chains and 54 links, more or less, to the north-eastern corner of the said Lot 423; thence due west a distance of 35 chains and 15 links, more or less, to the intersection of the left bank of the Fraser River; thence north-easterly along the left bank of the said river to the point of commencement; containing an area of 8.8 acres, more or less.

RODOLPHE BOUDREAU,

no20

Clerk of the Privy Council.

[2218.]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Monday, the 3rd day of November, 1919.

PRESENT:

HIS EXCELLENCY THE GOVERNOR- GENERAL IN COUNCIL.

WHEREAS section 5 of the "Dominion Railway Belt Water Act, 1913," provides, among other things, that all the waters within the Railway Belt of the Province of British Columbia shall, for the purposes of administration and during the pleasure of the Governor in Council, be placed under the exclusive control of the authorities of the Province of British Columbia, to be administered under and in accordance with the Provincial "Water Acts," as if the said Acts were enacted by the Parliament of Canada:

And whereas section 6 of the said "Dominion Railway Belt Water Act" provides that the Governor in Council may direct that any Act, or portion thereof passed by the Legislature of the Province of British Columbia after the 3rd day of March, 1913, shall apply to the waters within the said belt as if such Act were passed by the Parliament of Canada; and

Whereas by Order in Council of February 27th, 1915 (P.C. 369), the Provincial "Water Act,

1914," was made applicable to the British Columbia Railway Belt:

And whereas the Provincial authorities have requested that the amendments subsequently made to the said Provincial "Water Act, 1914," be also made applicable to the said Railway Belt, it being desirous that there should be uniformity in the administration of the waters throughout the Province:

Therefore, His Excellency the Governor-General in Council is pleased to order and doth hereby order and declare that the following amendments to the said British Columbia "Water Act, 1914," namely, the "Water Act Amendment Act, 1917" (chap. 75, 7-8 Geo. V.); the "Water Act Amendment Act, 1918" (chap. 98, 8 Geo. V.); and the "Water Act Amendment Act, 1919" (chap. 90, 9 Geo. V.), shall be effective for the purpose of the administration of the waters within the Railway Belt of British Columbia, and that the said amendments shall apply, subject to the provisions of the "Dominion Railway Belt Water Acts," as if they had been enacted by the Parliament of Canada.

"2. *Cutters* shall have a guard over knives.

"3. All pulleys, sprockets, chains, frictions, gears, and set screws shall be guarded.

"4. *Belting*.—Wherever women are liable to come in contact with belting it shall be guarded, so as to prevent it from attracting their dresses or hair.

"(See General Rules for transmission.)"

"ELECTRICAL SAFETY REGULATIONS.

"1. *Guarding Live Parts*.—All live parts of switches, fuses, circuit-breakers, control devices, relays, terminals, and other electrical equipment shall be adequately protected by metallic covers or cases, excepting that:—

"(a.) Covers constructed of insulating material may be allowed when equivalent protection is given.

"(b.) Live parts around switchboards, lightning-arresters, and other equipment for which the providing of covers or cases is not reasonably practicable shall be isolated by elevation or provided with suitable permanent enclosures, guards, or screens so arranged as to prevent persons or conducting objects from inadvertently coming or being brought in contact with the live parts. Around electrical machines and switchboards in power plants and sub-stations where accessible to properly qualified persons only, open live parts may under certain conditions be used without guards or screens.

"(c.) Open disconnecting knife-switches may be permitted, provided they are adequately isolated by elevation and operated only by approved insulating-rod with hook.

"2. Subject to the exceptions in the foregoing rule, all knife-switches in circuits of over 150 volts between conductors shall be enclosed in a standard approved steel box or cabinet or of iron-clad type, with switch-handle provided for external operation, and switch shall be operated by this handle only. This rule shall apply immediately to all switches as specified, with the exception that ordinary internally operated switch-boxes and open switches on switchboards and power-distributing panels which are otherwise in good condition may be permitted to remain in operation until such time as replace-

ment by the externally operated type is ordered by the Board.

"3. All externally operated switches shall have the 'on' and 'off' positions distinctly marked.

"4. The doors of all switch-boxes shall be kept closed and only opened after switch-handle is thrown to the 'off' position, with the exception that they may be opened with switch 'on' by properly authorized persons for the purpose of making examination of fuses or switch and where the driven machinery cannot be shut down during such examination.

"5. When any switch is open to allow of repairs or inspection of the equipment supplied, it shall be locked, or as far as practicable secured in the 'off' position, and notice 'not to be closed' attached thereto.

"6. All switches on switchboards and all switch-boxes shall be provided with identification for the circuits or equipment which they control.

"7. *Fuses*.—All fuses shall be of the regular approved enclosed type only, and shall be of suitable capacity to protect their cables and equipment. All bridging of fuses by wire or other material will be a violation of this rule.

"8. All fuses, except those in two wire circuits operating at not more than 150 volts between conductors and carrying not more than thirty amperes, shall be made 'dead' before handling: Provided, however, that fuses shall always be made 'dead' before handling, regardless of voltage and current, in locations where a person may have to stand on grounded surfaces when re-fusing. This rule requires an individual switch ahead of every fusible cut-out as specified for the purpose of separately disconnecting the fuses of each circuit from all sources of supply. Motors operated by starting devices which do not require separate knife switches ahead of them may have their running fuses made dead by branch feeder switch, provided same is within convenient access from these fuses.

"9. Combined fuses and switches installed after these rules go into effect shall be arranged with the switch ahead of the fuses. Switches fused at the top and installed previous to these rules going into effect shall be changed on special order of the Board.

"10. *Wiring*.—All wiring shall be installed and maintained in standard and approved manner. It shall be so protected as to reduce the life hazard as far as practicable; all necessary screens, guards, enclosures, conduits, or isolation by elevation being provided.

"12. Parts such as handles or levers which may move suddenly in such a way that persons in the vicinity are liable to be injured by being struck by them shall be guarded.

"13. *Electric Furnaces*.—Electric furnaces and arc welders, where intensely glowing or incandescent arcing parts may be exposed, shall be enclosed so that those parts will not be accessible or visible to unauthorized persons. Suitable protecting screens, hoods, gloves, and other devices shall be provided for and used by the authorized operators or others who must work or come near such parts.

"14. *Grounding*.—All exposed non-current-carrying metallic parts of electrical equipment operating at over 150 volts to ground shall be permanently and effectively grounded. This includes covers, cases, conduits, handles, levers, and such metallic parts for starters, switches, circuit-breakers, fuses, etc., and frames of motors, generators, transformers, switchboards, etc. This rule shall also apply to electrical equipment operating at less than 150 volts to ground, unless such equipment is effectively insulated.

"15. All transformer secondaries shall be grounded, provided the maximum voltage between the grounded point and any other point on the circuit does not exceed 150 volts.

"16. Ground-wires shall be properly run, secured, protected, and maintained throughout their entire length, and shall be attached to water-pipe or other satisfactory ground by means of a regular ground-

wire clamp or other method giving equivalent rigidity of connection.

"17. *Insulating Platforms*.—Insulating platforms or mats shall be placed in front of all switches, control devices, or other parts connected to circuits of over 150 volts to ground, and which may be handled when circuits are alive. Exceptions may be allowed by the Board at switchboards and panels in power stations and sub-stations where the type of equipment and construction used gives sufficient protection to the live parts.

"18. *Rotating Electrical Machinery*.—All rotating parts of electrical machinery shall be so constructed, maintained, and guarded to reduce all hazard as far as practicable.

"19. *Illumination*.—Adequate and suitable illumination as is necessary to prevent accident shall be provided at all switchboards, fuse-boxes, starters, control devices, around electrical machines, and at other places where persons may come into proximity to live parts.

"20. *General*.—Whenever practicable, motor starters or controllers shall be so placed as to be within view from their respective motors.

"21. When painting, cleaning, repairs, or other work has to be carried out by non-electrical men around any buildings, bridge, or other structure, and in proximity to wires or parts of electrical equipment which are so normally isolated by elevation, such wires or parts shall be provided with guard or shall be made 'dead' while the work is being done.

"22. When linemen are at work on poles or other structures located where persons pass and may suffer injury from falling tools, material, etc., a temporary guard, fence, or notice shall be used to prevent or warn persons from passing beneath the linemen.

"23. 'Danger, High Voltage' notices shall be placed in prominent position and maintained in legible condition in proximity to all electrical equipment of 750 volts or over, and which may be accessible to unqualified persons.

"24. Installation, repairs, extension, and changes of electrical equipment shall be carried out by properly qualified persons only.

"25. All electrical equipment generally shall be so constructed, installed, and maintained as to reduce all hazard as far as practicable.

"26. All electrical equipment shall be so constructed, installed, and maintained as to make all operating rules herein specified readily and conveniently practicable.

"27. When new type of equipment or new arrangements and methods of operation are adopted which might justify departure from any of the foregoing rules, special permission regarding use of same shall first be obtained from the Board.
